SUMMARY

Senior QA Engineer with **9 years** driving quality across mobile and enterprise applications in Agile environments. I help teams ship reliable iOS/Android products through strategic test planning, risk assessment, and cross-functional collaboration with automation and BA teams. Proven experience leading QA processes for complex systems from **AI-powered** mobile apps to security SDKs; using **Azure DevOps (ADO/VSTS)**, **Postman**, and various ad hoc testing expertise.

CORE COMPETENCIES

Technical Skills: **AI-driven QA optimization**, **Mobile/Desktop OS architecture**, **code analysis**, **hardware electronics**, **network technologies**, **advanced test suite optimization** including broad **AI usage**.

Tools & Environment: **Xcode**, **Android Studio**, **Microsoft Visual Studio Code**, **Postman**, **Charles Proxy**, **Figma**, **Sketch**, **Gemini**, **Flutter**, **LM Studio**, **Postman AI**, **SQL**, **Azure Service Bus**, **Firebase/Google Analytics + Crashlytics**, **Azure**, **.NET**, **SwaggerUI**, **SwaggerHub**, **Git via GitKraken**, **Perforce p4**, **TestRail**, **Browser DevTools**.

Project Management: **VSTS / Azure DevOps**, **Jira**, **Confluence**; **Agile (Scrum)**, **Waterfall**, **Hybrid**, **process of beta testing using Google Play Store console**, **Firebase**, **Apple TestFlight**, **Regression**, **Smoke** and **Ad Hoc/Exploratory testing**, **Risk-Based testing approach**, **AI optimisations**.

EXPERIENCE

QA Engineer / QA Lead | (NDA) USA public services company via [Trinetix](#)

January 2026 – July 2026 (7 months)

Project: Enterprise-grade mobile application with focus on customer engagement, serving a top-tier US waste management and recycling company.

- Leading the QA team and collaborating with web testing and automation teams.
- User Story (US) analysis, planning, grooming, participating in calls, executing and optimizing test plans.
- Assessed risk management, collaborated with the Business Analyst and other team members to ensure delivery and highlight high-risk areas.
- Assisted in creating and evaluating automated tests, maximizing revenue.

Key Technologies: **Google Gemini/Gemma**, **Flutter**, **Charles**, **VSTS/ADO**, **MS products**, **Postman**, **web console**, **IDEs**.

QA Engineer | (NDA) USA insurance company via [Trinetix LLC](#)

August 2025 – December 2025 (5 months)

Project: Innovative mobile application with **AI-driven** object recognition using LIDAR and video computer vision, on-device volume measuring, built-in CAD (with 2d, 3d editor).

- Holding the QA process and communication with the automation team, web testing, and business analysts.
- User Story (US) analysis and clarification, planning, grooming, participating in calls, executing and optimizing test plans.
- Assessed risk management, collaborated with Business Analysts and other team members to ensure delivery and highlight high-risk areas.

Key Technologies: **Google Gemini/Gemma**, **Flutter**, **Charles**, **VSTS/ADO**, **Postman**, **web console**, **IDEs**.

QA Engineer / QA Lead | (NDA) USA public services company via Trinetix

January 2025 – August 2025 (8 months)

Project: Enterprise-grade mobile application with focus on customer engagement, serving a top-tier US waste management and recycling company.

- Leading the QA team and collaborating with web testing and automation teams.
- User Story (US) analysis, planning, grooming, participating in calls, executing and optimizing test plans.
- Assessed risk management, collaborated with the Business Analyst and other team members to ensure delivery and highlight high-risk areas.
- Assisted in creating and evaluating automated tests, maximizing revenue.

Key Technologies: **Google Gemini/Gemma, Flutter, Charles, VSTS/ADO, MS products, Postman, web console, IDEs.**

QA Engineer | (NDA) Big 4 audit company via Trinetix LLC

December 2019 – January 2025 (5 years 2 months)

Project: Multiple (15+) applications: internal/external business tools, kiosk-mode systems, template generators, WYSIWYG editors, newspaper applications, SDK testing.

- Held the QA process by collaborating with web testing and automation teams.
- User Story (US) analysis, participated in planning, grooming sessions, and business calls; and executed and optimized test plans.
- Assessed risk management, collaborated with the Business Analyst and other team members to ensure delivery and highlight high-risk areas.

Key Technologies: **Xamarin/Flutter, Charles/Proxyman, VSTS/ADO, MS products, Postman, web console, IDEs.**

QA Engineer | (NDA) Secure Tech International company via SoftServe

July 2018 – December 2019 (1 year 6 months)

Contributed to a security SDK and corresponding multi-layered backend complexes for mobile application development at an industry-leading company, ensuring cutting-edge security and functional compliance. Included **AI features**, certificates, policy management, MDM and sensors.

QA Engineer | ROOM8 Game Studio

(3 months)

- Performed QA testing for a gaming project, covering web application and backend components.

QA Engineer | Entertainment Startup

(6 months)

- Supported QA efforts for a blockchain-based solution designed for festival management and secure payments.

EDUCATION

Master of Computer Engineering

National Technical University of Ukraine 'Kyiv Polytechnic Institute', Kyiv, Ukraine
